THE DEFINITIVE FIRE CLASSIFICATION DATABASE

REGISTER YOUR COMPANY TODAY!

EGOLF CLASSIFICATION DATABASE

The EGOLF CLASSIFICATION DATABASE is a 'one-stop' source of product information on both CE marked and non-CE marked construction products. It gives detailed information of the fire classifications produced by EGOLF member laboratories across Europe for products tested and classified according to European standards. EGOLF is the European Group of Organisations for Fire testing, Inspection and Certification www.egolf.org.uk.

WHAT IT DOES?

- Allows visitors to search on the basis of: classification type, product family/ sub-family, country of supply and country of test laboratory.
- Provides for simple comparisons of the fire behaviour of products and materials in the same family
 - Gives contact information of manufacturers
 - Provides for manufacturers wide ranging publicity for their products
 - Provides a tool for market surveillance for end-users

WHO IS IT AIMED AT?

The database can be used by anyone who registers, but is aimed at:

- Architects, specifiers and contractors wanting to find out about products with a particular fire performance
- Enforcement authorities wanting to confirm the validity of classifications
- Manufacturers wanting to verify their claims on product classifications to the market.

HOW IT WORKS?

Entering details of products is simple and free. You just ask the laboratory who undertook your test and classification to publish them on the EGOLF website. You can do that for all construction products using the form at the end of this leaflet. Send the completed form to the EGOLF laboratory that undertakes the test/classification. Alternatively, permission can be given for a single construction product on a case by case basis. For single construction products you will need to complete a 'permission to publish' form sent to you by the laboratory each time they generate a classification on your behalf.

HAVE A LOOK AT THE DATABASE

To view the database now, visit www.egolf.org.uk and click on 'Classification Database and Members Area Login'. Follow the onscreen instructions for registering and you will be sent a password. Once you have a password you can visit the site and view available classification documents.

HOW TO PROCEED

If you are a manufacturer and want your product classifications entered on the website; simply fill in the form opposite and send it to the EGOLF laboratory that undertakes your fire tests and classifications. If you use more than one EGOLF laboratory, you will need to send in one form to each laboratory.

For more information call 01925 646 665 or visit www.egolf.org.uk

To: **EGOLF Laboratory** (fill in laboratory details below)

Name: _____

Contact: _____

Address: _____

Telephone: _____ E-mail: _____

From **Test Owner/Product Manufacturer** (fill in test owner/manufacturer details below)

Name: _____

Address: _____

Telephone: _____ E-mail: _____

• I agree to the following information being made available on the EGOLF test and classification database for all products which are classified:

Test owner/manufacturer contact details, product name, product family, product sub-family, classification of fire performance, date of classification.

• I understand that it will be available to all registered users of that database, but understand that registration is freely available to anyone at no charge.

• I understand that the information can be removed at any time upon request.

Name: _____

Signed: _____ Date: _____

Authorised signatory for and on behalf of: Test Owner / Product Manufacturer
